ISSUED

Megan W Cammarano

LDR 1

I intend to finish my partially finished basement. This will involve laying down an insulated floating subfloor, insulating and framing three non-structural walls against the concrete slab walls, and hanging drywall on these three new walls.

The subfloor will be comprised of prefabbed Dricore subfloor modules.

The walls (30x10ft, 16x10ft, and 18x10ft) will be framed up to a height of 10 feet, constructed from residential grade steel studs and tracks, and will be insulated with multiple layers of XPS foam insulation. Drywall will be hung on the walls. No structural elements such as load bearing walls will be altered during this process. Existing egress in the basement will not be altered or removed.

The purpose of this remodel is to create an insulated storage and game room in the basement.
